Ett höjt försörjningskrav för arbetskraftsinvandrare

I promemorian föreslås att en god försörjning enligt 6 kap. 2 § utlänningslagen (2005:716) ska innebära att en arbetskraftsinvandrare får en lön som uppgår till minst 80 procent av den medianlön som Statistiska centralbyrån publicerar för Sverige.

Förordningsändringen föreslås träda i kraft den 1 oktober 2023.

1 Förslag till förordning om ändring i utlänningsförordningen (2006:97)

Härigenom föreskrivs att det i utlänningsförordningen (2006:97) ska införas en ny paragraf, 5 kap. 8 a § av följande lydelse.

Nuvarande lydelse

Föreslagen lydelse

5 kap. 8 a §

Med god försörjning enligt 6 kap. 2 § utlänningslagen avses en lön som uppgår till minst 80 procent av den medianlön som Statistiska centralbyrån publicerar för Sverige.

Den medianlön som gällde vid tidpunkten för ansökan ska tillämpas.

2 Ärendet

Den 6 februari 2020 fick en särskild utredare i uppdrag att bl.a. överväga åtgärder för att motverka utnyttjande av arbetskraftsinvandrare (dir. 2020:8). Den 25 juni 2020 beslutade den dåvarande regeringen tilläggsdirektiv (dir. 2020:69). Utredningen, som antog namnet Utredningen om arbetskraftsinvandring (Ju 2020:5), överlämnade den 2 februari 2021 delbetänkandet Ett förbättrat system för arbetskraftsinvandring (SOU 2021:5) och den 2 november 2021 slutbetänkandet Ett förbättrat system mot arbetskraftsexploatering m m. (SOU 2021:88). I slutbetänkandet finns ett alternativt förslag om krav på viss inkomst för arbetskraftsinvandrare. Förslaget behandlas i propositionen Ett höjt försörjningskrav för arbetskraftsinvandrare (prop. 2021/22:284). I propositionen föreslås att en arbetskraftsinvandrare genom sin anställning ska uppnå en god försörjning för att kunna beviljas ett arbetstillstånd. Riksdagen biföll propositionen den 30 november 2022 (bet. 2022/23:SfU9, rskr. 2022/23:42).

Regeringen anger i propositionen att den närmare innebörden av kravet bör regleras i förordning. Av bemyndigandet i 6 kap. 9 § utlänningslagen (2005:716), förkortad UtL, framgår att regeringen får meddela ytterligare föreskrifter om arbetstillstånd. Den här promemorian behandlar utformningen av förordningsändringen.

3 Nuvarande ordning

För att ett arbetstillstånd ska kunna beviljas en arbetskraftsinvandrare måste såväl försörjningskravet som övriga villkor i 6 kap. 2 § UtL vara uppfyllda. Försörjningskravet innebär att inkomsten måste vara av sådan storlek att personen inte behöver försörjningsstöd enligt 4 kap. 1 § socialtjänstlagen (2001:453) för att täcka sina kostnader för bland annat boende och uppehälle (propositionen Nya regler för arbetskraftsinvandring [2007/08:147] s. 59).

Enligt praxis innebär försörjningskravet också att inkomsten som huvudregel måste uppgå till ett visst schablonmässigt bestämt belopp (MIG 2015:11 och MIG 2018:12). Migrationsverket har beräknat att lönen, oavsett sysselsättningsgrad, som lägst måste uppgå till 13 000 kronor per månad. Vid beräkningen har Migrationsverket utgått från bl.a. riksnormen för försörjningsstöd, uppgifter från Statistiska Centralbyrån (SCB) och Konsumentverket samt skattetabeller från Skatteverket.

Övriga villkor enligt 6 kap. 2 § UtL består i att lönen, försäkringsskyddet och övriga anställningsvillkor inte får vara sämre än de villkor som följer av svenska kollektivavtal eller praxis inom yrket eller branschen. Migrationsöverdomstolen har uttalat att en helhetsbedömning

ska göras av samtliga anställningsvillkor och att så länge som villkoren vid en sådan bedömning inte kan anses vara sämre bör de kunna godtas (MIG 2017:24 och MIG 2017:25).

4 En god försörjning ska motsvara 80 procent av medianlönen

Förslag: För att uppnå en god försörjning ska en arbetskraftsinvandrare ha en lön som uppgår till minst 80 procent av den medianlön som Statistiska centralbyrån publicerar för Sverige.

Den medianlön som gäller vid tidpunkten för ansökan ska tillämpas.

Skälen för förslaget

Vad som ska avses med god försörjning

Innebörden av det nuvarande försörjningskravet för arbetskraftsinvandrare har i förarbetena preciserats till en lägsta gräns motsvarande nivån för när en person har rätt till försörjningsstöd. Enligt Migrationsverket motsvarar det en lön om lägst 13 000 kronor per månad. Enligt den lagändring som beslutades av riksdagen den 30 november 2022 ska det krävas att en arbetskraftsinvandrare genom sin anställning ska uppnå en god försörjning för att han eller hon ska kunna beviljas uppehållstillstånd, vilket innebär en höjning av försörjningskravet jämfört med dagens nivå. Frågan är vilken lön som ska krävas för att en person ska anses uppnå en god försörjning och på vilket sätt lönenivån ska fastställas.

Lönenivån bör vara precis och samtidigt kunna justeras kontinuerligt utan att bestämmelsen behöver ändras. Det bidrar till att systemet blir enkelt och förutsebart både för den enskilde och för tillämparen. Den nya lönenivån behöver också vara tillräckligt hög för att förändringen ska få avsedd effekt, nämligen att motverka arbetskraftsinvandring till de lägst betalda yrkena för att förhindra konkurrens med låga löner och utnyttjande av arbetskraftsinvandrare.

I remissvar till slutbetänkandet Ett förbättrat system mot arbetskraftsexploatering m.m. (SOU 2021:88) föreslår LO att försörjningsnivån ska höjas i nivå med den allmänna löneutvecklingen sedan utlänningslagens införande år 2008. Det skulle motsvara en höjning av försörjningskravet med cirka 40 procent. Regeringen anser inte att en sådan höjning kan anses vara tillräcklig för att ge en god försörjning. Dessutom kan den allmänna löneutvecklingen räknas ut på flera olika sätt och är därmed inte ett tillräckligt entydigt begrepp. Löneutvecklingen är därför inte lämplig att använda som referens för att bestämma en ny nivå på försörjningskravet.

Svenskt Näringsliv och *Almega* föreslår i sina remissvar att det nu gällande försörjningskravet ska ändras i relation till utvecklingen av konsumentprisindex (KPI) och fortsätta att justeras i relation till den utvecklingen framöver. KPI mäter de priser som konsumenten faktiskt betalar och visar den genomsnittliga prisutvecklingen för hela den privata

inhemska konsumtionen. Enligt ett par remissinstansers beräkning skulle detta motsvara en ökning av försörjningskravet med cirka 20 procent. Enligt regeringen är KPI visserligen ett bättre alternativ och har också den fördelen att försörjningskravet skulle justeras kontinuerligt kopplat till faktorer i samhället. Däremot är en höjning om 20 procent alltför låg för att uppnå de syften som ska uppfyllas med kravet på en god försörjning.

Ett ytterligare alternativ är att knyta det höjda försörjningskravet till det prisbasbelopp som varje år räknas fram på grundval av ändringarna i det allmänna prisläget enligt bestämmelserna i socialförsäkringsbalken (2010:110). Prisbasbeloppet används bland annat för att beräkna ersättningen från förmåner som garantipension, omvårdnadsbidrag samt ersättningarna från sjuk- och föräldraförsäkringarna. Beloppet utgör också grund för beräkningar av olika avgifter. Enligt regeringen är det emellertid en mer ändamålsenlig ordning att knyta det höjda försörjningskravet till en parameter som är kopplad till lönenivåer och som följer utvecklingen på arbetsmarknaden. Eftersom prisbasbeloppet inte är en parameter kopplad till arbetsmarknaden är det inte lämpligt att använda som referens för att fastställa vad som är en god försörjning för arbetskraftsinvandrare.

Företagarna för i sitt remissvar till slutbetänkandet (SOU 2021:88) fram att försörjningsnivån med fördel skulle kunna utgöra en viss del av medianlönen. Även *Teknikföretagen* för i en skrivelse till regeringen fram att ett försörjningskrav skulle kunna fastställas till en viss del (85 procent) av den svenska medianlönen.

Statistiska centralbyrån (SCB) publicerar varje år uppgifter om medianlön i Sverige. Medianlönen för 2021 var 33 200 kronor. SCB räknar ut medianlönen i förhållande till bruttolöner, dvs. månadslöner före skatt, och deltidslöner räknas om till heltidslöner. Medianlön är den mittersta lönen i en grupp löner som sorterats i storleksordning från den lägsta till den högsta och används för att visa ett representativt mått på lönen för en grupp. Medianlönen är klart avgränsad och beräknas årligen i förhållande till vad personer på den svenska arbetsmarknaden tjänar. Det är alltså en parameter kopplad till arbetsmarknaden och därmed lämplig för att fastställa vad som är en god försörjning för arbetskraftsinvandrare. Vidare är fördelen med att använda medianlönen i stället för medellönen, att medianlönen är mer rättvisande för genomsnittet om det finns personer som tjänar väldigt mycket eller lite i förhållande till resten av gruppen. Regeringen anser därför, i likhet med *Företagarna* och *Teknikföretagen*, att det högre försörjningskravet bör utgöras av en viss procent av medianlönen på svensk arbetsmarknad. På detta sätt blir lönenivån precis, men kommer ändå justeras över tid och följa medianlönens utveckling utan att bestämmelsen behöver ändras. Det kommer också att bli enkelt och förutsebart för såväl arbetstagare och arbetsgivare som för Migrationsverket vad som gäller.

Av uppgifter i slutbetänkandet (SOU 2021:88) framgår att den genomsnittliga inkomsten för fler än 70 procent av alla arbetskraftsinvandrare under åren 2019 och 2020 var 25 000 kronor eller mer per månad. Av uppgifterna går det inte att utläsa om personernas inkomst avser lön eller om den enskilde i stället för lön fått exempelvis sjukpenning eller föräldrapenning en viss månad eller om anställningen avslutats mitt i en månad. Det kan alltså inte uteslutas att lönerna i själva verket varit högre än vad uppgifterna visar. Utredningen har också

analyserat uppgifter för åren 2017 samt 2018 och drar slutsatsen att löneläget har sett relativt liknande ut även för dessa år. Det finns inte skäl att anta att löneläget sänkts generellt för arbetskraftsinvandrare under de senaste åren jämfört med hur det var under åren 2017–2020.

Medianlönen i Sverige år 2021 var 33 200 kronor. Det innebär att 80 procent av medianlönen med 2021 års medianlönenivå skulle innebära ett försörjningskrav om en lön på 26 560 kronor. Med den nivån på försörjningskravet skulle det stora flertalet arbetskraftsinvandrare alltså inte påverkas även om det kan finnas variationer mellan yrken och geografiskt. Samtidigt förhindras med denna nivå att systemet för arbetskraftsinvandring används för de lägst betalda yrkena. Dessa yrken saknar dessutom ofta krav på särskilda kvalifikationer. Sådana arbeten bör enligt regeringen i högre grad erbjudas arbetslösa personer i landet. Genom att sätta denna nivå kan också konkurrens med låga löner förhindras och risken för att arbetskraftsinvandrarerna hamnar i ekonomisk utsatthet minskar.

Enligt regeringen ska alltså den höjda försörjningsnivån innebära ett krav på en lön som varje månad uppgår till minst 80 procent av medianlönen på den svenska arbetsmarknaden. Det är endast de arbetstagare som söker arbetstillstånd enligt reglerna i 6 kap. 2 § UtIL som kommer omfattas av det höjda försörjningskravet. Därmed kommer bl.a. följande arbetstagare alltså inte omfattas av det höjda försörjningskravet:

- arbetstagare som kommer till Sverige genom att utnyttja den fria rörligheten inom EU,
- arbetstagare som söker eller har tillstånd enligt reglerna om EU-blåkort i 6 a kap. UtIL,
- arbetstagare som söker eller har tillstånd enligt reglerna om företagsintern förflyttning (ICT) i 6 b kap. UtIL och
- arbetstagare som söker eller har tillstånd enligt reglerna om säsongarbete i 6 c kap. UtIL.

Som framgår av propositionen Ett höjt försörjningskrav för arbetskraftsinvandrare (prop. 2021/22:284 s.15) är en höjd försörjningsnivå nödvändig för att reglera under vilka förutsättningar det är rimligt och försvarbart att en arbetskraftsinvandrare från tredjeländ ska kunna komma till Sverige och arbeta. Det höjda försörjningskravet påverkar inte i sig den svenska modellen på arbetsmarknaden.

Hur prövningen ska göras

Det nya försörjningskravet kommer att tillämpas på ansökningar som prövas från och med tidpunkten då lag- och förordningsbestämmelserna träder i kraft, såvida det inte finns skäl att tillämpa äldre lydelse av 6 kap. 2 § UtIL enligt övergångsbestämmelserna till lagen. Detsamma gäller vid förlängningsansökningar.

Det är den medianlön som gäller vid tidpunkten för ansökan som ska tillämpas. Det blir på så sätt förutsebart både för den enskilde och för arbetsgivaren vilken lön som är den lägsta godtagbara vid tidpunkten för ansökan. En nackdel med en sådan ordning skulle kunna vara att medianlönen justeras under tiden som ansökan ligger hos Migrationsverket. När ansökan väl prövas kan det alltså bli så att en äldre

medianlön tillämpas som referens. Regeringen anser dock att förutsebarheten för parterna har företräde i en sådan situation, särskilt som handläggningstiderna hos Migrationsverket kan variera.

Även fortsättningsvis gäller naturligtvis de övriga kraven i 6 kap. 2 § UtL om att lönen, försäkringsskyddet och övriga anställningsvillkor inte får vara sämre än de villkor som följer av svenska kollektivavtal eller praxis inom yrket eller branschen. Möjligheten som finns enligt 7 kap. 7 e § UtL att avstå från en återkallelse i ringa fall eller om en återkallelse med hänsyn till omständigheterna annars inte framstår som skäligen kommer också att omfatta även det höjda försörjningskrav som nu föreslås (prop. 2021/22:284 s.10–11).

5 Ikraftträdande- och övergångsbestämmelser

Förslag: Förordningsändringen ska träda i kraft den 1 oktober 2023.

Bedömning: Det behövs inte några övergångsbestämmelser.

Skälen för förslaget och bedömningen

Lagändringen ska träda i kraft den dagen som regeringen bestämmer. I enlighet med det som anges i propositionen är det väsentligt att lagändringen och förordningsändringen träder i kraft samtidigt. Förordningsändringen ska således träda i kraft samma dag som lagändringen, den 1 oktober 2023. Det finns inte något behov av övergångsbestämmelser.

6 Konsekvenser

Bedömning: Nivån om 80 procent av medianlönen kan få vissa konsekvenser för företagens kompetensförsörjning, men för de flesta företag får den inte någon betydande påverkan på kostnader eller verksamhet. Vidare bedöms nivån endast få en mycket liten påverkan på statliga myndigheter, kommuner och regioner.

Nivån kan också leda till att färre arbetstillstånd kommer beviljas generellt och att kvinnor kommer påverkas särskilt. Den ojämna könsfördelningen bland de som beviljas arbetstillstånd kan därmed komma att öka något. Den höjda försörjningsnivån kan antas bidra till att missbruket av systemet för arbetskraftsinvandring minskar, och till ett minskat utnyttjande av arbetskraftsinvandrare.

Skälen för bedömningen

Konsekvenser för företag

SCB publicerar varje år en genomsnittslön för varje yrke. Av de senast publicerade uppgifterna från 2021 framgår att den genomsnittliga lönen i vissa yrken ligger under 80 procent av den svenska medianlönen. I dessa yrken kan det alltså bli svårare för arbetsgivare att rekrytera arbetskraftsinvandrare. I konsekvensbeskrivningen görs en närmare analys av vilka yrken detta kan vara. I analysen används genomsnittslönen och inte medianlönen, vilket kan få till effekt att något färre yrken kommer att hamna under försörjningskravet än om medianen hade använts. Inte heller medianlönen hade dock gett en helt rättvisande bild av vilka effekter försörjningskravet får på just arbetskraftsinvandrare inom vissa yrken.

Snabbmatpersonal, köks- och restaurangbiträden samt städare och hemservicepersonal är exempel på yrken där de genomsnittliga lönerna ligger under 80 procent av den svenska medianlönen. Dessa yrkesgrupper kommer alltså sannolikt att påverkas av ett höjt försörjningskrav. Under 2021 utfärdades cirka 800 arbetstillstånd för snabbmatpersonal, köks- och restaurangbiträden och cirka 600 arbetstillstånd för städare och hemservicepersonal. Som en referens var det runt 70 000 snabbmatpersonal, samt köks- och restaurangbiträden anställda år 2020 i hela landet. Det var närmre 80 000 anställda städare och hemservicepersonal år 2020. Det är totalt sett fler anställda arbetskraftsinvandrare i dessa yrken än vad som anges ovan eftersom det som redovisas här är antalet beviljade arbetstillstånd år 2021. Siffrorna ger emellertid ändå stöd för att arbetskraftsinvandrarerna endast utgör en liten del av alla anställda inom yrkena snabbmatpersonal, köks- och restaurangbiträden samt städare och hemservicepersonal. Det kan dock finnas en viss risk att andra arbetstillfällen också kan gå förlorade om en arbetsgivare inte kan anställa en arbetskraftsinvandrare med särskild kompetens. Om det till exempel inte går att anställa en kock, finns det kanske heller inget behov av att anställa servicepersonal.

Ett annat exempel på yrken med en genomsnittlig lön under 80 procent av medianlönen är bärplockare och plantörer. Under år 2021 beviljades 5 546 arbetstillstånd i dessa yrken. De allra flesta bärplockare i Sverige är arbetskraftsinvandrare med arbetstillstånd enligt 6 kap. 2 § UtL. De är som regel utstationerade via bemanningsföretag i Thailand, vilket innebär att det är bemanningsföretagen som är arbetsgivare. Det bör framhållas att en arbetsgivare som är etablerad i Sverige även fortsatt har möjlighet att i stället rekrytera bärplockare i enlighet med 6 c kap. UtL om arbetstillstånd för säsonganställda och säsonganställningsdirektiv (Europaparlamentets och rådets direktiv 2014/36/EU av den 26 februari 2014 om villkor för tredjelandsmedborgares inresa och vistelse för säsonganställning).

Även vissa anställda inom kategorien växtodlare inom jordbruk och trädgård har en genomsnittslön under 80 procent av medianlönen. Inom dessa yrken beviljades 621 arbetstillstånd under 2021. Hur stor andel av arbetskraftsinvandrarerna som hade en lön under 80 procent av medianlönen framgår inte av uppgifterna, men sannolikt var det inte samtliga 621. Totalt

sett arbetade under 2020 knappt 20 000 personer som växtodlare inom jordbruk och trädgård.

Inom flera andra yrken är den genomsnittliga lönen visserligen inte under 80 procent av medianlönen men den genomsnittliga lönen ligger så pass nära det föreslagna försörjningskravet att det ändå finns skäl att anta att det finns individer som inte skulle nå upp till denna nya nivå. Det gäller bl.a. kockar, kallskänkor, skogsarbetare, målare, lackerare, skorstensfejare, montörer, kontorsassistenter, sekreterare, tidningsdistributörer, vaktmästare och övriga servicearbetare. Inom alla dessa yrken beviljades det totalt cirka 2 000 arbetstillstånd under 2021, vilket kan jämföras med att det under 2020 arbetade betydligt fler än 300 000 totalt inom yrkena. Även inom dessa yrken bedöms arbetskraftsinvandrare utgöra en liten del av det totala antalet anställda.

Bland de yrkesgrupper som nämnts ovan kan det finnas yrken med en viss risk för kompetensbrist, både genom att arbetskraft från tredje land med rätt kompetens inte kan anställas, och genom att fler arbetstillfällen kan försvinna när personer med nyckelkompetens inte kan anställas. För att komplettera bilden av konsekvenserna för företag kan det emellertid också vara av betydelse att närmare se inom vilka yrken det finns stor efterfrågan på arbetskraft och vilka av dessa som är vanliga för arbetskraftsinvandrare.

Migrationsverket presenterar varje år en förteckning över vilka yrken det finns en stor efterfrågan på arbetskraft (5 kap. 12 § utlänningsförordningen och MIGRFS 2022:11). På den senast fastställda listan från den 1 mars 2022 finns det 60 yrken, varav 19 är sådana som är vanliga för arbetskraftsinvandrare. Av dessa 19 är det endast restaurang- och köksbiträden där genomsnittslönen för yrket ligger under 80 procent av medianlönen. Industrielektriker, motorfordonsmekaniker och fordonsreparatörer finns också med på Migrationsverkets förteckning över yrken med stor efterfrågan på arbetskraft. Inom dessa yrken beviljades knappt 250 arbetstillstånd under år 2021. Kvinnorna, men inte männen, i dessa yrken har en genomsnittslön nära 80 procent av medianlönen. För de yrken där behovet av arbetskraft är stort som finns med i Migrationsverkets förteckning kan det alltså konstateras att ett höjt försörjningskrav om 80 procent av medianlönen i de allra flesta fall inget större hinder för fortsatt arbetskraftsinvandring.

Enligt den beslutade lagändringen ska det höjda försörjningskravet tillämpas på ansökningar om arbetstillstånd enligt 6 kap. 2 § UtIL från dagen för ikraftträdandet. Detta innebär att de arbetskraftsinvandrare som redan är anställda här och som söker förlängning av sina arbetstillstånd kommer att omfattas av det höjda försörjningskravet. Om den erbjudna lönen är lägre än 80 procent av medianlönen kan förlängningsansökan inte beviljas. Även vid en förlängningsansökan kan det höjda försörjningskravet alltså få vissa konsekvenser för företagen.

Regeringen ser allvarligt på risken för kompetensbrist inom vissa yrken. Det är dock viktigt att alla arbetskraftsinvandrare som kommer till Sverige tillförsäkras goda arbetsvillkor, och kravet på en lön som uppgår till minst 80 procent av medianlönen är en sådan åtgärd. Förslaget syftar till att åter skapa legitimitet åt systemet med arbetskraftsinvandring genom att stärka arbetskraftsinvandrarens ställning på arbetsmarknaden och motverka konkurrens med låga löner. I många fall handlar det också om

arbeten som bör kunna utföras av personer som redan bor i Sverige. Det ska också framhållas att arbetskraftsinvandrare utgör en liten del av det totala antalet anställda inom flertalet av yrkena. Ett undantag är bärplockare. En arbetsgivare som är etablerad i Sverige har emellertid fortsatt möjlighet att rekrytera säsonganställda bärplockare genom reglerna i 6 c kap. UtIL. Därutöver har regeringen genom tilläggsdirektiv till Utredningen om en behovsprövad arbetskraftsinvandring (dir. 2023:25) gett en utredare i uppdrag att analysera och ge förslag på mer genomgripande förändringar av systemet för arbetskraftsinvandring som också kommer ta hänsyn till hur risken för kompetensbrist ska kunna motverkas. Regeringen ser alltså att det finns många omständigheter som mildrar negativa effekter av det höjda försörjningskravet och att det finns flera goda skäl som talar för den föreslagna nivån på försörjningskravet.

Det höjda försörjningskravet bedöms få störst konsekvenser inom yrken med lägre lönenivåer. Företag som anställer arbetskraftsinvandrare inom yrken med lägre genomsnittslöner bör påverkas i huvudsak likvärdigt. Däremot kan det inom vissa yrken medföra en sämre konkurrenskraft internationellt med svårigheter att rekrytera arbetskraft från utlandet inom yrken som har lägre löner. Sverige ska dock inte konkurrera med låga löner. Det höjda försörjningskravet kan också innebära en minskad möjlighet att anställa arbetskraftsinvandrare på deltid. Så länge som försörjningskravet uppnås finns det dock inga begränsningar av anställningsgraden.

I en studie från Riksrevisionen (RIR 2016:32) beräknades i genomsnitt 2,5 procent av företagen i Sverige ha anställt arbetskraftsinvandrare under perioden 2009–2013. Detta motsvarar cirka 18 000 företag. Även om antalet beviljade arbetstillstånd har ökat sedan Riksrevisionens studie och en större andel företag därför har anställt arbetskraftsinvandrare är det fortfarande en relativt liten andel av företagen i Sverige som använder systemet för arbetskraftsinvandring. Andelen företag var som störst inom hotell och restaurang (15,7 procent). Som ovan konstaterats kan denna bransch därför påverkas särskilt. Mikro- och småföretagen anställde tillsammans 59 procent av alla arbetskraftsinvandrare medan större företag anställde 41 procent av arbetskraftsinvandrarerna. Av mikroföretagen är en stor andel av arbetsgivarna verksamma inom hotell- och restaurangbranschen (43 procent). Det höjda försörjningskravet är neutralt utformat men kan alltså komma att påverka små företag och vissa yrken i högre grad. Vid en sammantagen bedömning menar dock regeringen att regleringen inte kan eller bör utformas på något särskilt sätt för att konsekvenserna ska bli mindre för små företag. Regeringen avser dock att följa utvecklingen noga.

Konsekvenser för enskilda

Ett höjt försörjningskrav innebär en minskad arbetskraftsinvandring till låglöneyrken. Enskilda arbetskraftsinvandrare som redan arbetar i Sverige kan också få avslag på en ansökan om förlängning av arbetstillståndet om arbetsgivaren inte erbjuder en lön som uppfyller det höjda försörjningskravet och därmed behöva lämna sina anställningar.

Arbetskraftsinvandrare är en särskilt utsatt grupp på arbetsmarknaden. Ett höjt försörjningskrav kommer att stärka arbetskraftsinvandrarernas ställning på arbetsmarknaden, och generellt leda till bättre levnadsvillkor. Härigenom minskar även risken för att arbetskraftsinvandrares anhöriga, inklusive barn, lever under utsatta ekonomiska förhållanden.

Övriga konsekvenser

I den mån kommuner och regioner har arbetskraftsinvandrare anställda med en lön under försörjningskravet, exempelvis hemservicepersonal, kan det innebära en viss påverkan på kompetensförsörjningen. Arbetskraftsinvandrare utgör dock en så liten del av det totala antalet anställda även inom statliga myndigheter, kommuner och regioner att det höjda försörjningskravet endast bedöms få en mycket liten påverkan. Vidare bedömer regeringen att de statliga myndigheternas handläggning och bedömning av ärenden om arbetstillstånd kommer att förenklas när nivån på försörjningskravet nu preciseras. Det kommer inte heller innebära några ökade kostnader eller konsekvenser för det allmänna i övrigt. Någon finansiering bedöms därför inte behövas.

Könsfördelningen bland arbetskraftsinvandrare är överlag ojämn med en större andel män än kvinnor. Ett höjt försörjningskrav kan innebära att andelen män ökar ytterligare eftersom kvinnor i högre grad än männen har en genomsnittslön under 80 procent av medianlönen inom vissa yrken.

Mycket tyder på att personer som befinner sig i socioekonomisk utsatthet löper större risk för att såväl begå brott som att utsättas för brottslighet (En långsiktigt hållbar migrationspolitik, SOU 2020:54 s. 443). Ett höjt försörjningskrav bör bidra till en ökad levnadsstandard för de arbetskraftsinvandrare som kommer hit. Det höjda kravet bedöms också leda till färre arbetskraftsinvandrare inom de lägst betalda yrkena. Det är inom dessa yrken som en stor del av missbruket har konstaterats (SOU 2021:88, s. 154). Den höjda försörjningsnivån kan därför antas bidra till att missbruket av systemet för arbetskraftsinvandring minskar och ett minskat utnyttjande av arbetskraftsinvandrare. Ett precist och tydligt försörjningskrav kan också bidra till att förenkla arbetet för brottsbekämpande myndigheter.

Nivån bedöms inte få några EU-rättsliga konsekvenser. Den strider inte heller mot några internationella konventioner eller avtal som Sverige ska följa. Nivån bedöms inte heller få effekter på miljön.

Promemorian Ett förhöjt försörjningskrav för arbetskraftsinvandrare

Work Permit Holders Association (härefter WPHA) lämnar härmed sitt yttrande gällande remissinstans av Ett förhöjt försörjningskrav för arbetskraftsinvandrare Ju2023/00106 och anför följande.

WPHA delar uppfattningen att det har uppkommit ett orimligt högt försörjningskrav samt att bedömningen att det ej behövs övergångsbestämmelser är inkorrekt. Det höjda försörjningskravet grundar sig i att arbetskraftsinvandrare ska ha god försörjning. Som mått på god försörjning utgår regering ifrån statistik från SCB. Statistiken från SCB som regeringen hänvisar till (<https://www.scb.se/hitta-statistik/sverige-i-siffror/utbildning-jobb-och-pengar/medianloner-i-sverige/>) är dock inte ett mått på försörjning utan ett mått på lön. Alltså exkluderas tillexempel arbetslösa och pensionärer medan högre chefer inom bank, finans och försäkring (som har de hösta medianlönerna) inkluderas i statistiken. Dessutom tar statistiken från SCB ej hänsyn till anställningsgrad. Enligt nuvarande bestämmelser tar försörjningskravet hänsyn till anställningsgraden och därför bör den statistik som används för att fastställa försörjningskravet också göra det.

Många arbetar i dagsläget på en lägre anställningsgrad än 100% på grund av exempelvis studier. Det behöver förtydligas om personer som arbetar till exempel 80% då skall ha en heltidslön av 26 560 kr eller om det då krävs en heltidslön på 33 200 kr för att uppnå 80% av medianlönen. Ska nuvarande regler ändras så att försörjningen ej anses påverkas av anställningsgraden? I annat fall bör som sagt statistiken som används ta hänsyn till anställningsgraden.

Vidare tar försörjningskravet på 80% av medianlönen ej hänsyn till den svenska modellen där minimilön inte bestäms av regering och lag utan av fack och arbetsgivare i berörda branscher. WPHA föreslår att det förhöjda försörjningskravet ska ligga närmare kollektivavtalens bestämmelser istället för en missvisande medianlön från SCB. En person som är anställd inom städbranschen på 100% procent och täcks av Kommunals kollektivavtal har i dagsläget en lön på minst 22 517 kr. Med 2023 års löneläge kommer denna lön ligga på cirka 23 500 kr.

WPHA delar uppfattningen att det har uppkommit en felaktig bedömning när det gäller övergångsbestämmelser. Arbetskraftsinvandrare som kommer till Sverige kommer av olika anledningar, t.ex. förföljning, ekonomi, familj m.m. Sverige har skapat förhoppningar till dessa personer genom att försäkra om ett fungerade system som leder till permanent tillstånd och eventuellt medborgarskap om personen i fråga sköter sig. Detta har gjort att ett flertal personer har lämnat sina länder och valt Sverige istället för andra EU länder, de har lämnat sina karriärer, utbildningar och familjer för att starta sitt liv i Sverige. WPHA rekommenderar att personer som har fått sitt första arbetsvisum innan den 1:a oktober 2023 inte bör inkluderas av det nya försörjningskravet då det annars kan anses av EU domstolen som bedrägeri av importerad arbetskraft. Många av Sveriges arbetskraftsinvandrare har under sin tid i Sverige skapat familjer, relationer, företag, tagit lån för att köpa fastighet och i sin helhet bidragit till Sverige ekonomi.

WPHA anser att det förhöjda försörjningskravet kommer att skapa skildringar i arbetet

WPHA delar uppfattningen att det förhöjda försörjningskravet kommer att bidra till en orättvisa i flera företag och organisationer då företag som vill ha kvar sin personal från tredjeland då behöver öka löner på arbetskraftsinvandrare men ej på de svenskar eller personer från andra land som arbetar under samma företag. Det blir även en diskrimineringsfråga som grundar sig i etnicitet, två individer kommer att ha olika löner på grund av deras härkomst. Detta strider mot diskrimineringslagen (2008:567):

- 1 kap. 3 § Genom att införa ett försörjningskrav som är i närheten av medianlönen så diskrimineras det dels mot arbetskraftsinvandrare samt den svenska medborgaren. Individens lön kommer att bestämmas beroende på vilket land individen kommer ifrån och inte utifrån individens kompetens att utföra arbetet.
- 1 kap. 4 § Det skapas en indirekt diskriminering i efterföljd av denna bestämmelse, syftet vid rekrytering och anställning är att anställa en person med kompetens för yrket och skall ej vara beroende av etnicitet.

WPHA vill lyfta att ytterligare övergångsbestämmelser behövs då den nuvarande migrationspolitiken ej överlappar med de nya direktiv som ställs.

I dagsläget måste en person som får ett beviljat arbetsvisum dels bevisa att individen har en anställning hos ett företag eller organisation med kollektivavtal eller liknande arbetsvillkor, sjukförsäkring, livförsäkring, trygghetsförsäkring och tjänstepensionsförsäkring. Utöver detta så måste arbetsgivaren ha annonserat ut tjänsten i minst 10 dagar i Sverige. Grunden till ett säkert och tryggt arbete för arbetskraftsinvandrare är därav stabil.

En person som påbörjar ett arbetsvisum i till exempel städbranschen har därefter ej rätt enligt Migrationsverket att byta bransch de första två åren. Om en person därefter får ett förlängt

arbetsvisum så får man byta bransch men det skapar en stor risk för arbetskraftsinvandring då personen i fråga måste ansöka om ett nytt visum om man byter bransch. Detta är ett hinder då vi har arbetskraftsinvandrare som är högutbildade läkare, utvecklare, ekonomer, tandläkare m.m som ej får byta yrke till yrken som Sverige har behov av. WPHA föreslår att regeringen ser över denna bestämmelse och gör det lättare för arbetskraftsinvandrare att byta arbete om kompetens finns.

Slutord

WPHA anser att denna lagstiftning är inhuman och sätter en stor mängd människor i svåra situationer, inte bara arbetskraftsinvandrare drabbas utan småföretagare, större företag, kommuner, sjukhus, svenska familjer och svenska medborgare drabbas. Detta bidrar även inte till en förbättrad ekonomi i Sverige samt kan höja inflationen då företag inom hotell, restaurang och hushållsnära tjänster kommer att bli tvungna att höja sina priser. I dagsläget finns ett stort behov av hushållsnära tjänster samt inom hotell och restaurangbranschen men inte någon personal för att täcka upp behovet.

Utländska arbetstagare som bor i Sverige har alltid bidragit enormt till den svenska ekonomin. Trots att många av de lagförslag och lagar som stadgas utgår för att skydda arbetstagarnas rättigheter anser WPHA att det alltid finns utrymme att förbättra lagarna dels för arbetstagarna samt för Sveriges samhälle. WPHA ser fram emot att få möjlighet att få arbeta nära med regeringen för att göra Sverige ett ännu mer attraktivt land för utländska arbetstagare.

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

No.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

I have been frustrated and mentally depressed after getting the news of this new proposed law for work permit holders. It is not only affecting me mentally but also physically. I don't eat or don't feel like eating anything. This is giving me a really hard time to cop up with my day to day life. This depression is literally killing me from inside.

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

- 3-5
- 5+

Do you think that the new migration law will affect to your (other immigrant's) child?

- Yes
- No
- Maybe

If you think the new migration law will affect to your child, please explain how?

We came here in Sweden when my first child was just 11 months old and the second one born here in Sweden. So both of them are raising in Swedish culture. They are also adopt to the environment here. It will not be that much easy to teach them new cultures and adopting new environments. All the children's growing here they become sick due to the warm weather when they visits Bangladesh like warm country. They speaks Swedish, how can now we teach them to read Bengali language. Of course they can speak Bengali as we speak Bengali at home.

How much tax did you pay in last 5 years to Swedish Tax Agency? *

- 1 - 50,000 Kr
- 50,000 - 100,000 Kr
- 100,000-150,000

Have you established a business or contributed to the growth of any industries in Sweden? *

- Yes
- No
- Maybe

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

I don't think so. As who we are holding work permits we follow all the rules and regulations by local government or the government in extent. Because everyone knows that there will be a police inquiry when we are going to apply for permanent residency. So no one is going to involve in any kind of criminal or fraudulent activity.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

I am already getting sick. My mental health condition is so bad that I can't sleep. It's not easy to a new start at my homeland after 5 long years. Even today my SFI teacher was asking me that you look unusual, tired, stressed, black circles under your eyes. Is everything going okay with me and I answered of course no. I am tensed.

Not at all

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

It was start from scratch but after spending 4 years in Swedish society i think its really hard to go back when you integrated and contributed in the country. Its pretty stressful that whole 4 year will go in vain. Therefore, I want the government to atleast give us exemption otherwise its really difficult.

No, because our objective is to meet each of the requirements that migration requests for a residence, that implies not having a criminal record, the same requirements for those with high salaries.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

If implemented, it would not only ruin my life in Sweden, but my entire life, since returning to my country is not an option. I have invested years of my life in this country, work, money, I have sacrificed my profession in the hope of obtaining my residence and trusting in that this country keep its word and not suddenly want to turn everything around without any sense

No , never

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

It will vary badly effects in my life , i spent my valuable 5 years in sweden , if anything happen with this law , who will back my valuable time ? i spent my money ,time ,energy, thinking to make life & society better , i have my own house , my wife spent lot of money for decorations of the house , if we know before , we never do that , I got work permit with old law , why i gonna affect with this new law ? My EU colleague can work with 13000kr why I'm not ? Its 2023 discrimination should stop .

If you think the new migration law will affect to your child, please explain how?

If new migration law implemented then I might need to leave the Sweden. If I leave the Sweden then it will be tough for my children to adopt the environment and climate to our home country as they are not used to it. The environment in our country is so polluted which might lead to my children some big diseases. As we both have asthma problem before.

Not sure.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

It will negatively impact a lot for me as I will not meet the requirements so I might have to leave the Sweden. My both children are born here and they already engaged with the society. It will be difficult for them to adopt another society.

If you think the new migration law will affect to your child, please explain how?

I already deported Sweden once and after long struggle and 8 months waiting in my homeland i come back with work permit last month.If I can't fulfill the salary requirement, I can't extend my work permit extension so I need to deport with my family which affects physically, psychologically to my children. She born extremely premature (26 weeks) in Sweden and got treated in neonatal care unit she needs still some medication. It's very important for her to stay in Sweden I struggle lot to come back in Sweden. For my children this weather is suitable. It's very tough to adjust in very warm climates. In my country health sector and education sector is not well developed . My children born in Sweden and survived after long struggle with her health issues so in many ways she will suffer if new migration rules established and affect us who already invested our lives in Sweden

How much tax did you pay in last 5 years to Swedish Tax Agency? *

- 1 - 50,000 Kr
- 50,000 - 100,000 Kr

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

I don't think so. As immigrant we already struggle lot to secure our visa and always very careful to exhume ourselves from police records so immigrant never creates any situation which causes difficulties to get permanent residency

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

I am a medical doctor from my home land and having six years job experience in homeland and abroad. I got Sweden institute study scholarship and completed my masters in public health. Despite my high degree I work as personal assistant to survive and secure my visa in Sweden just because my baby needs to stay here for her better future. I sacrifice my career, invest my time to establish myself in Swedish job market, doing job by travelling another city every day. After long struggle I expect to be getting permanent residency. If new rules will establish, my company may not increase percentage of work or may be salary I may not extend my visa. If I have to deport with my family again I may not overcome .

Do you think that the new migration law will affect to your (other immigrant's) child?

- Yes
- No
- Maybe

If you think the new migration law will affect to your child, please explain how?

How much tax did you pay in last 5 years to Swedish Tax Agency? *

- 1 - 50,000 Kr
- 50,000 - 100,000 Kr
- 100,000-150,000
- 150,000Kr. +

Have you established a business or contributed to the growth of any industries in Sweden? *

- Yes
- No
- Maybe

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

I have not seen any case of such among work permit holders and their families. So, my answer is no and I do not think wp holders may engage with criminal or fraudulent activities just because they have less income than the median salary of Swedish citizens.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

I got my first work permit decision on 5 September 2019 and I am going to apply for my permanent residency on just before 5 September 2023 and it is obvious that I will not get my decision before 1 October 2023. The whole past 4 years I worked and contributed to the Swedish society and now I am getting the fear to get deported just when I will have submitted my PR application. This is a nightmare coming true. I have lived in Sweden for 7 years now, completed my studies as a fee paying student, got work permit, paid taxes accordingly, have lived decent life, have no criminal record or payment remarks but I will be punished because all of a sudden I will not be able to meet the new salary requirements set by the government which will then be implemented by the Swedish Migration Agency. I am dying inside just having the thought of wasting precious 7 years of my life. There must be hundreds of several others stories similar to me. This is mentally, emotionally and physically very distressing. There must be an exemption to the already being work permit holders to this suggested law, otherwise it will be very unethical to us. We never dreamt for a Sweden like this. Sweden can do much better. I am still hopeful that the government will do a better investigation on this regard before applying the proposed law into reality.

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

Work permit holders can never engage themselves with any kind of criminal or fraudulent activities. Because work permit holders are always examined by migrationsverket every 2 years when they apply for work permit extension.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

This law will badly affect in my daily life and in my workplace. I already built my career here in Sweden. I have family. Now it is not possible to build a new career somewhere else from zero.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

Off course no , we are hard working people , doing jobs and paying taxes here . We immigrants are not involved in criminal activities

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

I am pharmacist, learning swedish language, already done upwill be deported then I have to start again from zero . I want to give exam and work here as a pharmacist. I am already doing job here and paying taxes . Then atleast govt should give us a some time so we can get some time to get our professional job here we are not criminals . We are living our decent life here . This law had already negatively impact my mental health.

I don't think so.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

If new rules come into force my employer would not be able to afford us (120+ employees). Then surely we would be required to move back to our home country. In my case I have lived in this country for 6 years and I don't have the age to pursue a career in my home country. I will be jobless there and my family will face a huge financial crisis.

If you think the new migration law will affect to your child, please explain how?

My youngest daughter was born here in 2021 and we and our eldest son who is 7 years old are living here for last four years. My son has attended preschool here in Sweden and now is going to school. They are growing in Swedish culture, my daughter is also going to the preschool where she is interacting with swedish people. They also speak more Swedish than our own language. Also they are getting used to with Swedish weather so it will be very difficult for them adjust back home where the average temperature is 30 degree. Moreover my children are now comfortable with Swedish lifestyle so it will be very very difficult for them to adjust for them where the situation is totally opposite.

How much tax did you pay in last 5 years to Swedish Tax Agency? *

Not sure

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

It is mainly my children who will be affected most. Because of them I have come to this country to give them a better future. So if I have to go back home if I can't cope with the law it will be irreparable loss. I will have to start from the zero and all the hard work and struggle I have had here in last four years will go. In short I will lose my four years from my life with out any reason. If I knew the salary requirements will be like this I may not choose this country move. More over they can't change a system in the middle when there are many already in the system. It is against humanity.

Many of the work permit holders like us will not be able to cope up with this proposed salary increase, as a result all in a sudden we may need to move back to our motherland or other country which will have a negative impact to my child. My child has born and growing up in Sweden, if we suddenly take him away for here that might hamper his education, medication, food, environment, culture to some extend his mental health as he is already used to with Swedish system and we all know Childers are very sensative in nature.

How much tax did you pay in last 5 years to Swedish Tax Agency? *

Work permit holders are one of the best law abiding people in Sweden. I am pretty sure their crime rate is one of the lowest in Sweden. So they should at least get some respect from this society

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

During the corona time we restaurant workers opened the store and served everyone. We risk our lives, we got infected at work place but we still opened our stores to make sure no one die for food. But no the government is giving us feedback by sending us from this country. We work permit holders are tax payers. We don't take free money from the government. The policy makers should think about those matters before they make any wrong decision

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

Low income is not related to crime, that depends on each person and their integrity. There are those who have a good income and are criminals, for example.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

It has a strong impact on people's mental health and consequently on their physical state. It makes us feel that we are not human and that we have no value as people.

See we are living in sweden from 2019! After that we got work permit from 2021 and we have 1son and we also bought a new apartment recently. And if govt do establish this new rules to us rather than new applicant it's totally unfair! Now we have settled down almost! Now if this happening where we will go and how we manage? We have to start from first whereas we have every year paid the tax properly into my employer as well as in my business also moms! So what is our fault to be effected in this rules????

No, I don't think so because the money they earning is enough for there noraml life survival here in Sweden.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

I am living in sweden since 3 years almost and I am doing my best to be a part of Swedish society, I am studying and working here also clear my Swedish language course C and now in Course D. So, as a human I am trying my best to give best from my side to be a part of Swedish society but these new rules news almost every day make me stress and make me demotivate because inspide of doing just parting or doing bad stuff I am giving my best in good way like Swedish language, tax pay, studing, working. So, I request migration to support us, motivate us instead of making us stress as you can't judge a whole society of thousands just base on few guys. Thanks

If you think the new migration law will affect to your child, please explain how?

My children are born in Sweden, now they are in school going age. They are integrated in the society. If we were deported, they will be more prone to the following risks.

Loss of education opportunities: Deportation may disrupt a my children's education, especially as they are attending school in the Sweden. They may face challenges in reintegrating into their home country's education system, encountering language barriers or different curriculum requirements. The loss of educational continuity can impact their long-term prospects and opportunities.

Access to healthcare and social services: In the Sweden, my children have been receiving necessary healthcare, which could be compromised or unavailable in their home country. This may lead to a decline in their physical and mental well-being due to inadequate access to healthcare, nutrition, and support systems.

Economic hardship: Deportation can result in economic hardship for both the children and parents. In the Sweden, my children have access to better economic opportunities, which could be lost upon return to their home country. This can exacerbate poverty levels, limit their access to essential resources, and hinder their overall development.

Exposure to unsafe conditions: In my case, my children may face dangerous or unstable conditions in their home country due to political unrest, violence, and economic challenges. We already have life threats in my home country. We didn't visit our country for last 8 years. Being deported to such environments can put their safety and well-being at risk.

Cultural adjustment difficulties: Children who have spent a significant portion of their lives in a Sweden may struggle with cultural adjustment upon return. They may feel like outsiders in their home country, facing challenges related to language, customs, and societal norms.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

Never Ever. We all are very educated people. We are law abiding citizens. If some peer group of government think that Work Permit holders may engage in Criminal Activity then this is target Racism.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

Today, I want to share with you a deeply concerning development that is affecting me personally and has broader implications for the values we hold dear. Sweden, the country I have called home for the past eight years, is in the process of introducing a new immigration law that will have a detrimental impact on my life and the lives of many others like me. During my time in Sweden, I have dedicated myself to contributing to the country's economy and have experienced some of the best moments of my life here. I have worked tirelessly, paying my fair share of taxes, and as a professional accountant, I have strived to make a positive difference. However, due to the constraints of the Swedish immigration law, which has bound me to a work permit for a job at McDonald's for the past seven years, I have been unable to switch to a more suitable position within my field. Despite my efforts and sacrifices, I had hoped that my dedication and contributions would eventually lead to permanent residency and the opportunity to open my own successful accounting firm in Sweden. Unfortunately, the recent actions of the Swedish government have left me feeling disheartened and betrayed. It seems that the government's decision to implement this new immigration law is rooted in racism, as it undermines the rights and aspirations of individuals like myself who have invested years of their lives in building a future here. Is it not a form of racism when the government can easily discard someone's hard work and sacrifices? Is it fair to dismiss the dreams and ambitions of individuals who have dedicated themselves to a country, only to face the risk of sudden deportation and the prospect of starting their lives from scratch with limited resources? I firmly believe that diversity and inclusivity are the cornerstones of any progressive society. By implementing such restrictive policies, Sweden risks alienating and excluding individuals who have already proven their commitment and worth through their contributions. These policies not only undermine the principles of fairness and justice but also tarnish Sweden's reputation as a champion of human rights and equality. Today, I stand before you, deeply concerned about my future and the future of countless others who face similar predicaments. It is my hope that by sharing my story and raising awareness about the consequences of this new immigration law, we can spark a meaningful dialogue and encourage the Swedish government to reconsider its actions. Let us remember that our society thrives when we embrace diversity, respect the rights of all individuals, and provide equal opportunities for success. Together, we can work towards a more inclusive and compassionate Sweden, where every person's contributions are valued and celebrated.

I don't have child. But I have been survived here alone since 2018. I work hard every time, I suffered a lot. There was a hope everything will be okay but this new law proposal will destroy everything.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

It's not true. Every work permit holder are living their life with no crime. They might suffer for law income but they are not doing anything illegal. They clearly know that, if thay do any crime or illegal activities they will not be granted PR by Migrationsverket. They will be fired by employer as well.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

This new law will impact so badly to me and my family. I am living here alone since 2018. I came here as a student and then I converted to work visa. I passed my last 5 years with so much struggle, hard work, depression. I am doing a hardworking job with low income since 2019. I had the opportunity to change my profession but I didn't because of strict rules of Migrationsverket. Even we are not allowed to do a 2nd job. So I did hard work and I am still doing to get PR near future. I paid taxes, didn't do anything against law. Even we all got work permit and maintaining our work permit by following the law. We didn't do anything illegal. But how come u proposed a law against us without any exemptions. This proposal is completely against current work permit holders and it is clear injustice for us. It is against humanity. We did hard work, we invested our valuable time and we pay taxes. This proposed law is okay but we just want it will not affect any extension holders.

Not at all. Immigrants are contributing to society and living peacefully.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

Off course. I couldn't meet the requirements so i have to leave country which is mental shock for me and my family. I invested my time and paid taxes for living here. And this new law is totally unfair and inhumane for all those immigrants who get work visa with different requirements.

I think , Immigrants under work permit have not enough time to do so. Because they work for the documents. They have a goal to achieve. They also loyal to law and order.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

If the government want to change income requirements then they should increase their salary accordingly. Lots of work permit holder and small company would be effected if the law become implemented.

- 0
- 1-2
- 3-5
- 5+

Do you think that the new migration law will affect to your (other immigrant's) child?

- Yes
- No
- Maybe

If you think the new migration law will affect to your child, please explain how?

My Child is born over here . Already started förskola speaking swedish,,,,, it Will be too much difficult for him to go to Anyother place and learn more languages

How much tax did you pay in last 5 years to Swedish Tax Agency? *

- 1 - 50,000 Kr
- 50,000 - 100,000 Kr
- 100,000-150,000
- 150,000Kr. +

Have you established a business or contributed to the growth of any industries in Sweden? *

- Yes
- No
- Maybe

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

No never . Immigrants are not criminals. We are only doing our job , paying taxes and living our life peacefully

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

Off course it Will affect me alot . I am health care professional, learning Swedish language to preparing myself to give profeciency test. If migration Will change the rule unfortunately i have to leave the country and the time which i have invested here to learn language and culture Will be wasted . Again i was on zero level. It Will affect me and my family badly.

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

People on work permit try to follow the country's laws. That's the reason why we are with legal status here and working.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

I have invested a lot of time learning Swedish. I have also invested my life in this country. I've been living here for almost for years and I think it is quite unfair that I have to go back to my country after living in this country for so many years, have learned the language and adapted myself to the society.

No, because me and my family is willing to settle down here. So by doing any criminal activities we will never want us to put in an adverse situation

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

We left our country just settle down here leaving all all opportunities back there and invested our whole savings to come here and settle down here. So if the proposed immigration law will pass that will force us to leave Sweden ultimately which will effect my kid's future and out's too

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

There is no possibility for an individual possessing a work permit to partake in any form of criminal activity, for a fundamental reason exists. Such individuals undergo a comprehensive assessment conducted by the migration agency, wherein any existing criminal records are thoroughly examined. If any such records are found, the individual in question will be deemed ineligible to obtain a permit. Consequently, they will face rejection and subsequent repatriation to their country of origin.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

The new law will undoubtedly have a significant impact on me. I arrived in this country with a sense of hope, drawn by its commitment to protecting the rights of its people. Unfortunately, everything I was promised could be jeopardized by this law. Due to various reasons, I am unable to return to my home country. I have worked diligently to rebuild my life from scratch, demonstrating my integration into society through responsible living, hard work, tax contributions, and pursuing education.

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

If you think the new migration law will affect to your child, please explain how?

I do not have a child right now, but this will affect me and my spouse. I have been living in sweden for almost 4 years with job and earning good enough money for my family. I have paid a huge amount of taxes in this 4 years period and haven't taken back a single kronor from government in any form of help or anything. I have just contributed to this country in form of my taxes. And now all of a sweden this law of 26560sek will affect my work permit extension massively and would eventually result in me losing my job if this new law imposed on existing work permit holders. This is totally unacceptable to implement this on existing work permit holders.

How much tax did you pay in last 5 years to Swedish Tax Agency? *

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

Not at all. Work permit holders are the most law abiding individuals because they are already going through enough scrutiny from government and migrationverket. They totally work inside the framework of law and paying huge taxes to this country.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

We work permit holders have paid so much time and money in taxes to this country so imposing this law on existing work permit holders will impact negatively from every aspect of life and mental health. If government want to put this law, please do so. But not on existing work permit holders. Implement this for first time applicant of work permit holders. Thanks

If you think the new migration law will affect to your child, please explain how?

When i came in here Sweden in 2018, my one child was 5 and other one was 1. They are going to Swedish school now and socially use to here. I came in here only for child future. I sacrificed lot of things for them like my job with handsome salary. If i return back home that adversely effect in my child. Certainly, they will not match in new environment and new country. Sorry to say, they did not understand my home land language. They are fluent in Swedish and Swedish culture. They love this country.

No, not at all. In between me and my family income trying to maintain better way. Me and my family background is good. I came in here as a Masters student. So. It is not appropriate with me.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

It is badly affect in me and my family life. I will be loss my job that will effect in my financial life . If i return home country then it will be same. Without suicide i have no way at this time.

Not really, people who have been working is more likely to be productive and law abiding people and they just want a good life that's all I think crime is not there thing !

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

People who have been in Sweden and applied for a work permit and did everything by the laws and regulations to get a permanent residency or citizenship those people have a life too so all of a sudden stripping away their privilege and implementing new rules is just wrong. If those people are being included in the new rules that just would not be fair

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

No they are very hard working people.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

Me and husband living in Sweden more than 3 years now. We both have individual work permits. The new rules will affect so many immigrants who has established a life here. We payed the tax in time, respected all the rules of Sweden as well! I have enough salary but my husband's salary is below 26k . I think there are thousands of immigrants who will be affected by this rule. When we came here in Sweden we knew to get a work permit we need this much salary and we planned according to that threshold. However if the new rules implement then it will be a disaster for so many people. All those previous years, our hard work everything will be in vain! I really hope the government will consider us and exempt us from the new salary threshold!

I strongly disagree. Crime may of ocured by any individual not necessarily it has to the done by an immigrants.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

I am on my first work permit. Those who are already granted a work permit, should not be put into any new law. This is a violation of rights. If the new law is applied for those who are already in work permit, I will have to return to my country where I have left my career in a not so good environment to live with low standard of life and invested the prime time of my life along with my spouse for to build a quality life here in Sweden. All the struggle, hard work, time will go in vain just for an unjust regulation which is about to happen. Hope the situation will change.

having a work permit doesn't make immigrants more prone to crime. Behavior is driven by personal choices, not immigration status.

I haven't seen any case personally, i think this new government just dont like immigrants who came here as asylum seekers then they become part of some criminal activities but the government just focusing on those good people who just work here and pay taxes and support their families, government cannot remove those asylum seekers who got permanent residency so they targeted us who always obeys law and never been into a crime.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

When i came here in sweden i lost everything in my country but i was just planing to settle here for better life and better future of my family, after all these years of hard work they just kicking us out without any reason, if they want to tighten the rules then please start with new work permit applications as per international law. Swedish government just being so racist that they want to apply this new law to a person who came here 5 years ago on thos previous rules. What i get after leaving everything behind and working here so hard if in the end i have to leave sweden, i know i will end my life after that because i have no where to go and no more future, i put my life at stake when i came here and after spending 5 years here they are making new rules and implement on all of us.

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

Might be

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

We immigrants as a student or work permit holders work for the swedish nation to earn our livelihood. Mostly the immigrants are doing tough jobs in labour market. The new laws are negatively affecting the lives of immigrants who are working hard and paying a huge percentage of tax as well. As a student we pay a huge amount and try to find a job along with studies as it is becoming very costly to live in Sweden day by day. No employer is gentle enough to pay 26500 except high professional jobs. It is also not very easy to get a professional job in Sweden even after the completion of degree. So it will be very hard for all the immigrants to survey here in Sweden. We request the authorities to reduce the threshold limit.

If you think the new migration law will affect to your child, please explain how?

Our sudden loss of jobs will lead to financial difficulties for us which can result in a reduced standard of living for our child. This mean fewer resources for his basic needs, education, healthcare, and extracurricular activities. It will obviously increase emotional distress, stress and disrupt his daily life. Certainly it will adversely affect his future because the standard of living and the care he is getting here will be disrupted. We will not be able to give him the same standards of living and security he is getting here. We are really worried about him.

How much tax did you pay in last 5 years to Swedish Tax Agency? *

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

No. Obviously not. We are hard working people. We always pay our taxes and bills on time and not taking any government incentives money or help for our family. We are law abiding people who work very hard to settle here to have a secure and stable life.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

It will and is already negatively affect me and my family especially my child as we, both of his parents, are here and working here. We are in a stressful situation. If we suddenly become jobless and have no work, and have to relocate it will adversely affect my child. Our future will become uncertain. We have no other income which can support us in our future. Relocation and finding another job in our home country will be really difficult as there is low job opportunities with low salary. We came here by selling our properties in our homeland to settle here. All of a sudden new law will scatter all our dreams.

A large number of people will be crazy because of this law. They will loose their hope and future here so they can do everything they want.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

I don't have that much salary according to the new law so I have to leave the country and I will have an uncertain life. I trusted the existing law so I came here and serve for this country and society but now they are ignoring my human rights. We must be exempted from this law as a current work permit holders. It can be enforced for the new people and they will take plan accordingly.

I do not know from anyone of my surroundings. All the transactions' taxes deducted at sources how can anybody make fraudulent in Sweden.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

It is hampering my sustainability, investment and overall life. No doubt such proposal is not grounded actual facts and figures. It is just a random observation of some politicians who are not aware the beauty of European Union means Multicultural Diversity. This is the most important factor for sustainability to meet the Agenda 2030.

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

All of the current work permit holders are staying legally here in Sweden and contributing the society in a legal manner. They are happy people and they came to Sweden for a better life, leaving all the frustration and bad life they had in their home country. Imagine if they are not valued anymore in Sweden, they will not be willing to return back to their home country, as they had a terrible experience in their home country. It will be Sweden, who will be responsible to destroy these peoples current life and future, which may unfortunately let them to engage with criminal or fraudulent activities. If you google today for a reason, why people engages with criminal activity, you will come out with a thousands of examples which includes, frustration with their life as a prime reason.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

I am married and I have future plans for my babies. I had a vulnerable life in my home country, where me and my wife, we both were mentally disturbed as we were not welcomed by our very own people. Most of the people who faced the problem we faced, are giving up their life by either damaging their married life, or by doing suicide. I used my qualification to leave my home country forever and started doing my masters, which gave me hope in my life to do something for my family as well as for the society. I couldn't finish my masters studies yet, thus, I switched to a part time work permit, which kept my hope alive to complete my masters. Currently, I am working at mid-night as a newspaper distributor and studying in the morning to complete my degree. My wife is a doctor. She is done 50% with her language studies, which is required for her license exam, so, she can practise her medical profession here in Sweden and contribute to the Swedish society with her medical qualification. She is on her half way to complete her language studies and I am on my half way to graduate from my masters studies from IT. All of a sudden, all the efforts that we both made seems to be invalid soon for this new law. Sweden has given us purpose in our life again, given us hope again to live happily here. We were happy family, going forward with the dream of raising our upcoming children in this beautiful society. We never expected our hope, our dream will be destroyed like this. If we have to go back again in our home country, we will be doomed very badly. I will again face the mental torturing that I had and I may give up my life. Please, let me live my life with full potential that I have and contribute to the society as long as I live. Sweden's problem is people who came here as an asylum and doing nothing, and being involved in criminal activities. We, who are in work permit and working legally, are not the problems.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

Criminality is a function of greed not income. A criminally minded individual will always engage in criminal activities irrespective of his/her income.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

The new law will make resident permit holders to engage in salary racketting. Employers might also exploit their employees who will be desperate to meet the new requirements. Some jobs mostly part time jobs will be badly affected.

If you think the new migration law will affect to your child, please explain how?

Today, I stand before you with a heavy heart, burdened by the uncertainty that looms over my family's future. As a loving parent and a diligent worker, I have embraced Sweden as my new home. I arrived here in 2021, driven by the hope of a brighter future for my wife, my seven-year-old daughter, and myself.

Since November, I have been proudly contributing to the growth and prosperity of this great nation. Every month, I diligently fulfill my responsibilities by paying my taxes, knowing that I am supporting the very fabric that holds this society together. We have not only abided by the laws but also embraced the rich culture and values of Sweden, cherishing the warmth and inclusivity it offers.

However, today, the shadow of a new migration law hangs over us. A law that threatens to tear apart the foundation we have carefully built, jeopardizing our daughter's dreams and aspirations. She has blossomed here, embraced the language, made friends, and started to feel like a true part of Sweden's vibrant tapestry. To uproot her now would be to strip away the sense of belonging she has fought so hard to forge.

Imagine the pain in her innocent eyes as she questions why the place she loves so dearly might be taken away from her. Picture the confusion etched on her face as she tries to comprehend the notion that her future hangs in the balance, a future that now feels uncertain and fraught with heartache.

For a child, stability and continuity are vital. We, as parents, strive to provide an environment where their dreams can take flight, where they can grow and thrive. It is in this very environment that our daughter has found solace, identity, and a sense of purpose. To snatch it away would be an injustice, a cruel twist of fate that she does not deserve.

I implore you, as compassionate human beings, to consider the human side of this law. Look beyond the statistics and numbers, and see the faces, the dreams, and the potential that could be lost. Remember that the future of a child hangs in the balance, a future that could be forever altered if we are forced to leave.

I urge you to think of the values Sweden holds dear—fairness, compassion, and the pursuit of a better tomorrow. Let us embrace these values and ensure that our daughter, along with countless others like her, can continue to be nurtured by this land that has become her home.

How much tax did you pay in last 5 years to Swedish Tax Agency? *

- 1 - 50,000 Kr
- 50,000 - 100,000 Kr
- 100,000-150,000

Have you established a business or contributed to the growth of any industries in Sweden? *

- Yes
- No
- Maybe

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

I DO NOT believe that a work permit holder may engage in criminal or fraudulent activities in pursuit of lower incomes.

First and foremost, let me assure you that as work permit holders, we are individuals who have chosen to come to Sweden with hope in our hearts and determination in our souls. We have embarked on this journey with a profound respect for Swedish laws and society, knowing that compliance and integrity are essential to our success and acceptance.

We are acutely aware that any involvement in criminal or fraudulent activities would not only jeopardize our work permits but also undermine the trust and goodwill extended to us by this nation. It is this fear, this awareness of the consequences, that serves as a constant reminder to us. We live each day with the utmost caution, ensuring that we do not make any missteps that could lead to the revocation of our visas.

As work permit holders, we recognize the importance of contributing positively to Swedish society. We are driven by a genuine desire to integrate and build a future for ourselves and our families. Our dreams are intertwined with the prosperity of this nation, and we hold dear the values that make Sweden the remarkable place it is.

We understand the value of hard work, the dignity it brings, and the respect we earn through our honest endeavors. Our focus is on building a stable life, providing for our loved ones, and embracing the opportunities that Sweden has graciously offered us.

It is crucial to recognize that work permit holders, like any other law-abiding individuals, contribute to the growth and development of this great nation. We stand united in our commitment to upholding Swedish laws and values, fostering an environment of trust, cooperation, and progress.

So, I implore you to look beyond stereotypes and preconceived notions. Recognize that work permit holders are driven by an unwavering respect for Swedish laws, a desire for integration, and a commitment to building a better future. We stand shoulder to shoulder with our Swedish counterparts, dedicated to the prosperity and well-being of this remarkable land we now call home.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

Firstly, I want to highlight that the new law's emphasis on higher salary requirements may unintentionally create obstacles for qualified individuals who have valuable expertise to contribute to the Swedish economy. While I understand the intention behind it, we must consider that not all professions or industries offer high salaries, especially for those starting their careers or pursuing opportunities in fields with lower wages. It is important to strike a balance between immigration regulations and the genuine aspirations of individuals seeking a better life in Sweden. Relying solely on income thresholds to assess an individual's potential contributions and commitment to society may overlook the diverse talents and skills that immigrants bring. Education, experience, adaptability, and willingness to contribute to the local community should also be taken into account. Moreover, it is crucial to acknowledge that the increased salary requirement may disproportionately affect individuals from underrepresented backgrounds or those facing economic challenges. This could create additional barriers for those already striving to overcome socio-economic disparities, limiting their opportunities for growth and advancement. Considering the negative impact of this new immigration law, we must remember Sweden's proud tradition of inclusivity and compassion toward immigrants. Implementing rigid salary requirements might undermine the very values that have made this nation a beacon of hope for those seeking a fresh start and a brighter future. Instead of solely focusing on income thresholds, let us adopt a more holistic evaluation process that considers an individual's potential, skills, aspirations, and commitment to integrating into Swedish society. By doing so, we can unlock the full potential of immigrants, enabling them to make meaningful contributions to the nation's growth while fostering a diverse and inclusive society. In conclusion, I kindly request your consideration of the broader implications and unintended consequences that the new immigration law, particularly the increased salary requirement, may have. By adopting a comprehensive assessment framework that goes beyond income alone, we can uphold the principles of inclusivity, diversity, and equal opportunity that make Sweden an exemplary destination for individuals seeking a better life.

Do you think that the new migration law will affect to your (other immigrant's) child?

- Yes
- No
- Maybe

If you think the new migration law will affect to your child, please explain how?

My daughterWhen considering the potential impact of the new migration law on my child, it is essential to understand the emotional and practical consequences it would bring. My child has grown to love Sweden and considers it home. The law's implementation would disrupt her sense of stability, uprooting her from her friends, school, and familiar surroundings. This sudden change would deeply affect her emotional well-being and academic progress.

Education is vital for her future, and the new law could hinder her ability to continue her education in a stable and consistent manner. This disruption would have long-term implications, limiting her career prospects and personal growth. Additionally, the fear of separation from her parents and the constant uncertainty imposed by the law would create unnecessary stress and anxiety, hindering her overall well-being.

As parents, we strive to provide an environment where our child can thrive. We ask for your consideration of the potential negative impact on children. Let us prioritize their well-being and ensure they have the stability and opportunities they need to reach their full potential.

How much tax did you pay in last 5 years to Swedish Tax Agency? *

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

No, immigrants holding work permits are unlikely to engage in criminal or fraudulent activities for lower income. They respect the laws and live with the fear of jeopardizing their visa status. They are committed to upholding Swedish laws and society.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

The new immigration law, especially the increased salary requirement, would negatively impact my life in Sweden. It would create barriers for individuals and families like me who want to contribute to the country. It could limit employment opportunities, disrupt family stability, and hinder our ability to make meaningful contributions to the local economy. It is important to recognize the valuable role immigrants play in fostering diversity, innovation, and economic growth. Striking a balance between regulations and acknowledging immigrants' potential is key to a prosperous future for all.

Right now I am always worried and frustrated about my own and my family's future that what will going to happen in future life in sweden. Sweden is one of the happiest nordic countries, that's why we came to live here, but now with these type of rules, which create more headache and concern about our future. The people who are working here along with me, will come unemployed, our family in own country will get a hazzard life, all these hamper my mental peace and health.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

No most of the immigrants are trying their best to settle down in Sweden. They won't jeopardise their settlement for short term criminal activities. However, there might be some people who could be involved but majority of immigrants abide by Swedish laws

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

As an immigrant in Sweden, this law will affect me and many others like me who are struggling and trying hard to fit in the Swedish culture. We work hard and try our best to fulfill all the standards set by Swedish government but sudden change in laws are going to affect us badly.

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

They will have no choice , starting businesses which wouldn't even exist in reality just to buy time .

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

We live an orderly life , we work , we follow the system , we pay taxes and we work in these odd jobs because it's not easy to find a white collar job . Now when we liked ourself with these jobs , they suddenly want to change the rules without even thinking that they agreed with us on the previous rules and gave us work permits and we were looking forward to settle down in this country . If it doesn't works out we will have to leave this country and put the same effort again in some other country as our countries are destroyed .

Do you think that the new migration law will affect to your (other immigrant's) child?

- Yes
- No
- Maybe

If you think the new migration law will affect to your child, please explain how?

If the law introduces retroactive measures, it may disrupt the stability and continuity of my child's life. For instance, if we are unable to meet the new requirements and our work permits or residence permits are not renewed, it could result in forced separation from our established community, friends, and educational institutions. This abrupt disruption can have detrimental effects on my child's emotional and social development, as well as their sense of belonging and identity. Their regular education and cultural learnings will be greatly affected.

Moreover, the implementation of stricter migration laws can create an atmosphere of uncertainty and insecurity for our family. The fear of potential deportation or being unable to maintain our current standard of living can cause significant stress and anxiety for both me as a parent and my child. This stress can have negative consequences on my child's mental health and overall happiness.

In summary, the new migration law can have a profound impact on my child's life, including their access to education, healthcare, social connections, and overall well-being. It is essential that the authorities consider the potential consequences on families and children when implementing such laws and ensure that the best interests of the child are taken into account.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

No. It never happened before. Work permit holder's are busy to maintain salary and balance the daily life!
We don't have time for any unusual activities.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

The new immigration law for salary increase could negatively impact my career prospects, financial stability, standard of living, and prospects for social inclusion. It is crucial that policymakers carefully evaluate the potential repercussions and consider alternative approaches that balance the needs of both employers and work permit holders, while fostering an inclusive and diverse society.

How many of your children were born in Sweden?

- 0
- 1-2
- 3-5
- 5+

Do you think that the new migration law will affect to your (other immigrant's) child?

- Yes
- No
- Maybe

If you think the new migration law will affect to your child, please explain how?

How much tax did you pay in last 5 years to Swedish Tax Agency? *

- 1 - 50,000 Kr
- 50,000 - 100,000 Kr
- 100,000-150,000
- 150,000Kr. +

Have you established a business or contributed to the growth of any industries in Sweden? *

- Yes
- No
- Maybe

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

No. And the proximity is much lower comparing other group of immigrants. There is a need of showing statistical report on crime by work permit holder immigrant or who came into this country as foreign worker or student then converted as work permit holder.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

No

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

Never. Because the people who have got work permit in a legal way if you can check their background you will see everybody is highly qualified and educated.... And also belong from a respected family background..... So they are getting low salary because of the language barrier.... they have not able to learn language because of academic course curriculum in English...it's difficult to learn swedish while you have to study in English....there is no exposure to swedish language..... so now they are doing a low salary job and at the same time they are trying to learn swedish language.....whenever they will able to learn swedish language properly definitely they will be in respected positions in sweden.....

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

Hi.....I am a student of Uppsala University....I came here for my masters course in biomedicine.... I am a graduate doctor from my country.....after coming here I have fell in love with the Swedish culture.....most important I felt strong connection to the helpless old people who live in ole home alone.....they miss their family but there is no one who can talk with them.... They are just all alone.....after that I decided to stay in sweden and also decided that one day I will be a palliative physician in sweden..... I will dedicate myself to those old people who are suffering from loneliness.....so I was preparing myself for that.....but in the meantime my family suddenly went through some major crisis.....and needed to support my family..... so I finished 60 credits and got a job in a cleaning company and I Became work permit holder from student visa.....I started working in a cleaning company because during my masters course it was completely impossible to learn swedish for me....because my masters course was in English.....so there were no exposure no opportunities to learn and practice swedish.....if I need swedish medical license I need to learn swedish 1st.....to learn swedish I must have to stay in sweden.....so to stay in Sweden I need work permit visa.....so inspite of being a foreign doctor I am working as a cleaner.....because I don't know swedish language no one gives job here without proficiency in language except cleaning and restaurant..... I am preparing myself for the license exam in Sweden....I have fallen in love with sweden.... I want to adapt Swedish culture.... I want to be a doctor in Sweden..... I want to serve old people in sweden.....is it my mistake???? Is it a crime to love a new country new culture?????

Of course it will badly effect them, because for this we many of us will los our job if we don't have work permits here.

They already grow up in Swedish culture they have society ,friends here it will be so hard to move another country for them, they will get mental trauma about suddenly change in life

If you think the new migration law will affect to your child, please explain how?

This can be particularly challenging if the family relies on the income of the parent who is unable to meet the requirements.

The situation can become even more complicated if the family members, including children, are dependent on the parent's residency status or visa. If the parent's status is affected due to the new law, it may have consequences for the entire family's ability to continue living in Sweden. Overall, the new law on immigration and salary requirements in Sweden may present challenges for individuals who are already in the country and seeking new job opportunities or salary raises. It is essential for affected individuals to understand the specific requirements and explore alternative options that may be available to them.

How much tax did you pay in last 5 years to Swedish Tax Agency? *

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

When it comes to criminal,I could say it best of individual not a set of grounds eg work permits holder.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

Indeed, the new law on immigration and salary requirements in Sweden can have implications for individuals with families and children. Since the law introduces stricter regulations and salary thresholds, it may create difficulties for parents who are already residing in Sweden and want to continue living with their families.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

Not actually. Well, life can be a bit tough but not to be forced to do criminal activities.

I think, it's the opposite. We work permit holders are generally always respectful towards the law and don't want any bad record against our files in any way.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

Well, it wouldn't be easier to find a new job that pays above the proposed salary requirement and need to start again from the scratch. Two things I hate and literally detrimental for my mental and physical well-being are instabilities and insecurities which will be in plenty. On top of that, I have bipolar disorder type 1. So this extra stress are something that I really do not need at this moment or ever. I wanaa grow and shine and think about the future, but the proposed laws will ser me ten step back and erase 4 years of precious time investment in a country where I wouldn't be welcome just for monetary discrimination. I would leave my job and current income source.

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

No. This is very risky for work permit holders, because they risk losing visa and banned from coming back to Sweden. In my opinion criminal activity is done more by the established employers and established persons - with permanent and Swedish or EU citizenship as they do not risk losing their status in Sweden. That is why punishing law abiding and tax paying society members is discrimination for the side of the law

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

I would have to leave Sweden where I am established and have done nothing wrong. As someone who came from Denmark to be able to live with her husband here, which in fact also got a good job here, is in risk again of deportation. The new rules should be exempted from those who already established in Sweden.

If they want to do so, they should go back to their respective countries and do whatever they want. That's what the problem really is. We as a people have made the mess out of our places and now we are looking for heavens on other planets and countries. So, a big no. No one should be engaged in such activities.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

There are both positive and negative angles to it. Right now, the world is facing an economic recession. During these difficult times, doubling the salary requirements makes the situation even worse. Sure, bigger and highly profitable companies can afford to higher an employee with that salary but not everyone will be able to do this. Government should wait for better times or else they will ruin whatever good is left for a middle class family.

I have work permit on 13500 Sek before tax, i never committed any criminal activity or fraudulent activity, it varies from person to person and some low income people can also commit criminal acts and some high income people can be involved in fraudulent activities as well.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

For labour, this salary threshold is very high, please review your policy as we have given our energy and our time to Sweden economy and industry betterment. So please value our contributions lower the salary threshold for labour working like in newspaper companies cleaning etc. Give the relief to the people who already have the residence permit work permits.

How are you affecting the New laws proposed by the Swedish Government?

Recent proposals to increase the salary threshold for work permit holders in Sweden from October 2023 are causing concern for many people who are already living in the country and have a work permit.

The proposed salary increase will significantly impact these individuals and their families, making it more challenging for them to maintain their current lifestyle and provide for themselves and their loved ones.

Absolut inte, vi har vårans sysselsättning och försöker alltid skapa ett bra liv för framtiden, vi har jobbat i flera år ,betalat skatt (vi betalade lön till police anställda, brandman, sjukhuset, kommunen, även partiledarna och) och planerat för framtiden .

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

Vi har satsat vårans liv här i sverige,blivit en del av samhälle,gjorde våra bästa på jobbet och betalat så mycket skatt, med det som regeringen som har höjt försörjningskrav,förstöra vårans liv och fördärvar vårans framtid som vi har planerat som bor i en demokratik land.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

It is completely non sense. Because the people who hold work permits are came here for a betterment for themselves and their family. They can never engage with criminal activities. With the passage of time they grew more and more and they become a part of Swedish culture. They are the ones who contributed more to Swedish economy.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

Me and my family spend our golden time in Sweden. We gave our blood and sweat to this country. Now that I'm applying for my PR they are about to change the rule which of course will negatively impact me and my family. I had so many plans after getting PR but seems like they will regret the most after implementing this new rule.

Do you think that Immigrants who hold Work permit may engage with criminal or fraudulent activities for lower income? (explain in few words) *

Not really. I think all immigrants should not be considered as criminals. There may be some bad nuts which should be cleared from the system but not using high salary requirements which can affect genuine and good immigrants. Proper structures and systems should be put in place to get rid of the bad ones.

Is there anything else you would like to share about how the new immigration law would negatively impact you and your life in Sweden? *

Most companies do not give high percentage contract to new employees. Therefore meeting the salary threshold will be a difficult task. I think individuals who are already on work permit should be excluded from the new regime
